DETAILED ACTION

Election/Restrictions - Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a physical barrier for an orifice in a panel member, classified in class 52, subclass 514.
- II. Claims 12-20, drawn to a method of sealing an orifice in a panel member, classified in class 156, subclass 71.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the physical barrier for an orifice in a panel member (i.e., product), as claimed, can be used in a materially different process such as you can use in a wall portion that doesn't sandwich the wall between the patch and the plastic carrier (i.e., use in another environment).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Election/Restrictions - Election of Species Requirement

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I - Figs. 1A/1B;

Species II - Fig. 2;

Species III - Figs. 3A/3B;

Species IV - Figs. 4A/4B;

Species V - Figs. 5A/5B;

Species VI - Fig. 6;

Species VII - Fig. 7; or

Species VIII - Fig. 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic to all species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Attorney Glen E. Forbis on 20 September 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
